

January

Dear Sirs,

I am writing this letter in protest
of the usage of downed animals in our food chain. Could not this practice be
eliminated for the safety of our peoples?

Other alternatives must be available
for keeping our farm animals healthy.
The proper feeding and care given
would help, I am sure.

Those animals presently, who are not
in stable condition may be disposed
of humanely and be used in the
fertilizer industry or in other sources.

Please give rise to our current crises
in todays society and act on
Petition 98P-0151 CPI, prohibiting
such downed animal practices which are
threatening our nations health.

Sincerely,

Miriam Kearns
